note Turkey pen off  
side of barn

The light roofed low  
"building" over my right  
shoulder is just a wire  
chicken pen. long mesh  
fences along sides

We built big tubs of water  
over wood in that field.

after kill the chickens  
They were dunked in water  
so the big feathers could  
be pulled off (by Helen  
and June). A machine  
in the tack house helped  
remove the feathers and  
pin feathers
